

Yamanashi Prefectural Maglev Exhibition Center

Experience what **500km/h**
feels like!

The Yamanashi Prefectural Maglev Exhibition Center is the only facility in Japan where visitors can see up-close a Maglev train running at a speed of 500 km/h.

The test train that recorded the fastest speed in the world (at that time) in 2003 is on display here as a symbol of this facility, alongside various other exhibits including a diorama featuring a Maglev train and a miniature Maglev which allows visitors to experience a levitated run.

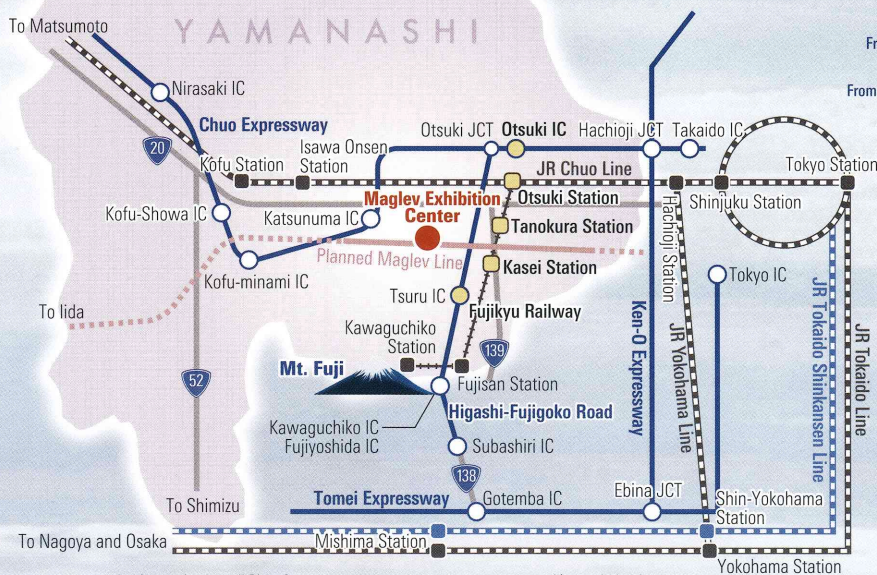

In the Maglev Exhibition Hall, you can experience how 500 km/h feels on the "Learn about Maglev," "Experience Maglev," and "See the future of Yamanashi" floors.

Visitors can see a running Maglev train from all floors and even experience the wind pressure from the Observation Terrace located on the second floor.

In addition, the adjacent Yamanashi Pavilion, equipped with a gift shop, a Yamanashi tourism and product information counter, and an observation room, shows visitors the appeal of Yamanashi and Maglev technology.

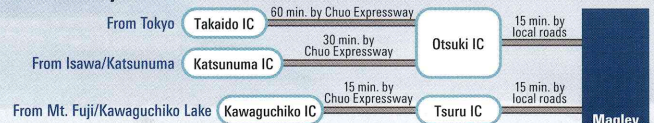

Access

*See the Center's website below for more information about access to the Center, including the bus timetables.

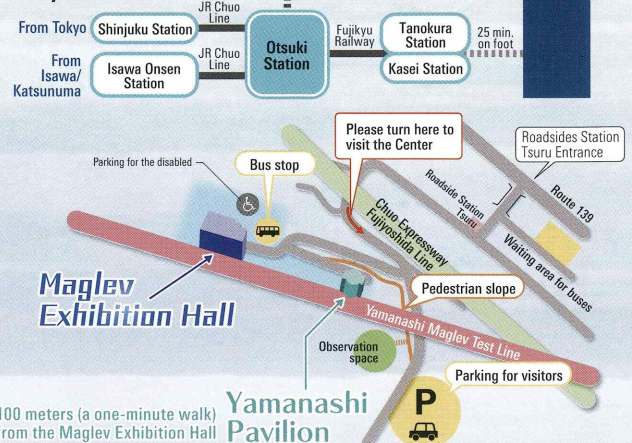

*An interchange (IC) refers to an expressway entrance and/or exit in Japan.
A junction (JCT) refers to a place where multiple expressways meet.
